Pencil-type Packaging

Pencil-type packaging is crucial in the food industry for packaging powdered and liquid materials into sachets and single-serving packets for restaurants, cafes, hotels, workplaces, camping, and more. This type of packaging provides easy access and consumption anytime and anywhere, making it highly popular among consumers.

Pencil sachet packaging is widely used for various powdered materials such as spices, hot chocolate, coffee, instant coffee, coffee mix, and liquid products like shampoo, hand wash, disinfectant alcohol, honey, ketchup, mayonnaise, French dressing, syrups, beverages, lemon juice, vinegar, and more, in single-serving sizes and pencil or stick shapes.

Pencil-type Sachet (Powder) Machine

Packaging Material	Length	width	weight	Products
Trespaphan, metallized film, pearlized cellophane, aluminum foil	3 to 15 cm	2.5 to 10 cm	1 to 50 grams	Spices, sumac, thyme coffee, cocoa, coffee mix, pharmaceutical and chemical

Pencil-Type Volumetric Sachet Machine

Packaging Material	Length	width	weight	Products
Trespaphan, metallized film, pearlized cellophane, aluminum foil	3 to 15 cm	2.5 to 12 cm	10 to 50 grams	Salt, sugar, jelly, pharmaceutical and chemical materials, etc.

Three-Side Seal Packaging

The appearance of these sachets is different from others. Three sides of the sachet are sealed, making it suitable for both powdered and liquid materials

This type of packaging is used for granular materials such as salt and dried vegetable powder, various coffee derivatives, and also for thin and thick liquids

The machine is customizable for packaging length and width, as well as printing the desired dates

Sachet Three-Side Seal Machine

Packaging Material	Length	width	weight	Products
Trespaphan, metallized film, pearlized cellophane, aluminum foil	3 to 15 cm	2.5 to 12 cm	10 to 50 grams	Salt, sugar, jelly, pharmaceutical and chemical materials, etc.

Powder Sachet Three-Side Seal Machine

Packaging Material	Length	width	weight	Products
Trespaphan, metallized film, pearlized cellophane, aluminum foil	3 to 15 cm	2.5 to 12 cm	1 to 50 grams	Spices, sumac, thyme, coffee, cocoa, coffee mix, pharmaceutical and chemical

Liquid Sachet Three-Side Seal Machine

Packaging Material	Length	width	weight	Products
Trespaphan, metallized film, pearlized cellophane, aluminum foil	3 to 15 cm	2.5 to 12 cm	1 to 50 grams	Sauces, lemon juice, honey, olive oil, shampoo, various creams, gels, etc.

Four-Side Seal Packaging

Four-side seal packaging is one of the most modern and stylish packaging methods in the world. One of the most interesting sachets, used for both powders and thick or thin liquids, is the four-side seal sachet. As the name suggests, these sachets are sealed on all four sides.

Sachet Four-Side Seal Machine

Packaging Material	Length	width	weight	Products
Trespaphan, metallized film, pearled cellophane, aluminum foil	3 to 15 cm	2.5 to 12 cm	10 to 50 grams	Salt, sugar, jelly, pharmaceutical and chemical materials, etc.

The machine is customizable for packaging length and width, as well as printing the desired dates

Pouch Packaging with Weighing Machine

Weighing pouch packaging, used for various products such as dried fruits, nuts, legumes, snacks, etc., operates fully automatically. The weighing process is carried out mechanically using 10 cups.

Packaging Material	Length	width	weight	Products
Trespaphan, metallized film, pearlized cellophane, aluminum foil	5 to 40 cm	8 to 23 cm	10 to 1100 grams	Sugar, tea, toffee, nuggets, dried fruit, chips, pulses, etc.

This method is used for packaging various dry and semi-moist food, pharmaceutical, and chemical products, including legumes, nuts, raisins (dried fruits), chips and snacks, laundry powder, herbal medicines, and more.

Key features of this packaging model include high speed in product packaging and precise weight accuracy (down to milligrams).

What are the Advantages of Single-Serving Sachet Packaging?

One of the most significant advantages of this type of packaging is the ability to market the product itself. Since the packaging is small, a small amount can be provided to customers for quality testing. After they are satisfied with the quality and price, they may purchase larger quantities. Offering samples is one of the best advertising methods. For example, shampoos, creams, conditioners, etc., can be packaged in single-serving sachets and offered to customers to familiarize them with the quality of your product. The same applies to food items and spices. Additionally, small travel-sized packs have a strong market demand.
